

About NETe2 Asia

Established on 13 June 2000 in Singapore, NETe2 Asia is a business solutions provider. We provide videoconferencing, webconferencing and streaming solutions to multinational corporations, government agencies and military forces as well as other businesses. Due to our strong network and client referrals, we have customers and partners from all around Asia Pacific.

As the sole authorised distributor of Tandberg systems, we are the trusted choice for many organisations, both MNCs and SMEs. We provide top-of-the-market solutions such as Tandberg, Polycom, VPresenter, ClearOne and many others. Our professional in-house R&D team conducts extensive research to improve our products constantly.

We market a wide range of high quality videoconferencing systems to empower businesses.

Vision

- To be the choice provider of cutting edge professional multimedia and conferencing solutions in Asia Pacific.

Mission

- To provide the latest high quality videoconferencing, webconferencing and streaming systems to global enterprises, multinational companies and government agencies.
- To provide personalised consultancy and turnkey multimedia solutions to businesses.
- To invest in R&D to continually improve our products and solutions.

What we do

We offer professional consulting, integration and operational services for audiovisual communications such as Audio/Video conferencing, Streaming Video and Multimedia Networks.

We know how to utilise these technologies in solutions that will optimise your business. We have been serving few hundred multinational corporations and governmental agencies. We have the capability to install and support these solutions worldwide.

We are able to fulfil this due to our expertise and competence in this field. We also have strategic alliances and strong partners to make it work. Our expert consultants know the technology thoroughly and customise them to develop industry solutions that are built on the most appropriate network architecture for your needs.

Our Business Focus

NETe2 Asia provides solutions and services in Video Conferencing, Audio/Visual systems, Video Streaming, e-learning and software development. Our solutions can be categorised into:

Conferencing:

- We provide a one-stop video/voice/data conference solution and services.

E-learning:

- We provide e-learning solutions to the business community and government agencies.
- Our solution includes content delivery in multiple formats and management of the learning experience.

E-services:

- We provide consultancy, project management, installation, testing, commissioning, on-site support and operation of the system.
